MARKET REALITY

The Problem & The Solution

THE PROBLEM

- Markets run 24/7 — humans cannot monitor every venue
- Emotional decisions lead to losses
- Proven strategies locked inside private funds
- No live visibility into managed products

THE SOLUTION

- One engine runs four strategies around the clock
- AI-driven — no emotion, only data
- Passive income for all investor levels
- Full transparency: every move visible live

PLATFORM

What is Arbzen AI?

Algorithmic intelligence. Arbitrage strategies. Network-based earnings.

Artificial Intelligence

NLP models parse 2M+ data points daily. Adaptive leverage.

Algorithmic Trading

Four sleeves: momentum, arbitrage, market making, reversion.

Arbitrage Strategies

Cross-venue dislocations captured before market correction.

Network Earning

Single-level 5% referral. Real-time credit. No multi-level.

PROCESS

How It Works

Scan. Identify. Execute. Generate.

AI Scans
140+ exchanges in real time

→

02
Identifies
Signals detected instantly

→

03
Executes
<20ms order routing

→

04
Generates
Daily accrual 00:00 UTC

ENGINE

Four Sleeves.
One Risk Governor.

Momentum

Rides confirmed trends.
Largest live allocation.

Arbitrage

Buys cheap, sells rich across 140+ venues.

Market Making

Harvests bid-ask spread thousands of times daily.

Mean Reversion

Positions for the snapback.
Smooths the book.

PROTECTION

Security Overview

Multi-layer framework. Maximum protection of data and funds.

Data Security

- ✓ TLS 1.3 end-to-end encryption
- ✓ AES-256 at rest
- ✓ Bcrypt-only passwords
- ✓ Mandatory 2FA + FIDO2 Elite

Fund Security

- ✓ 95% cold storage, 3 continents
- ✓ Multi-sig, keys offline
- ✓ Segregated per-client ledgers
- ✓ Assets never lent or staked

Risk Management

- ✓ Automated stop-loss
- ✓ Volatility circuit breakers
- ✓ Smart capital distribution
- ✓ Drawdown caps 24/7

Anti-Fraud

- ✓ Real-time monitoring
- ✓ Suspicious activity detection
- ✓ Anomaly scoring per payout
- ✓ Human review every withdrawal

TRUST

Zero Black Boxes.

Every number watchable as it happens.

Live Terminal

Every signal streamed to your dashboard instantly.

Per-Transaction Ledger

Every accrual carries a reference. Full history replayable.

Public Payout Feed

Confirmed → on-chain → hash attached. Tracked end-to-end.

On-Chain Proof

Quarterly insurance fund attestations published publicly.
